

BRANDON JEPSON

(916) 251-6401 | Brandonjeps7@gmail.com | linkedin.com/in/bjepp | Provo, UT

BASE CASE - master reservoir, no role targeting. Variants derive from this file; see resume-playbook.md.

MBA candidate (BYU Marriott, Apr 2027) with a record of building the measuring instrument for his own job - pipeline trackers, funnel reporting, research agents - across sales, partnerships, and product work. Writes requirements, works between customers and engineering, and ships more working tools than most.

EXPERIENCE

AI Foundry @ BYU (Student-Run AI Product Studio)

May 2026 - Present

Founding Member, Head of BYU Products | Director of AI, Cougar Strategy Group

Provo, UT

- Product lead on a pharmaceutical client engagement: delivered an audit of present-state operations and scoped the product hypothesis - in a generics market with razor-thin margins, the inputs to project-worthiness projections are the product.
- Appointed by faculty as Director of AI for Cougar Strategy Group: instructing MBA leads on strategic AI integration, leading an undergraduate support team, and acting as AI systems engineer across its seven-stage engagement model.
- Own the studio's BYU product line, scoping internal campus engagements into buildable product work.

Redo (Post-Purchase & Returns Software for DTC Brands)

May 2026 - Aug 2026

Partnerships, Business Development (MBA Summer Internship)

Draper, UT

- Wrote a four-page PRD from the partnerships manager's requirements and built the pipeline tracker to spec - it made forecasting and deal preparation easier, gave leadership visibility into pipeline growth, and proved the concept enough that leadership grew the team with a seasoned partnerships hire; trained my manager and VP and transferred ownership - still the team's operating rhythm when I left.
- Consolidated a 3PL partner channel scattered across team spreadsheets into one CRM dashboard - 43 meetings booked with C-suite and VP operators at prospective partners representing \$2B+ in annual revenue, 33 held in nine weeks, the visible business case for investing in the channel.
- Rebuilt the partner offer after leadership killed the original as unscalable - a per-order margin cut on returns the 3PL already ships, pure profit with zero added labor - and built the pricing and unit economics my manager carried to market; it anchored the channel's most engaged partner conversations.
- Instrumented the channel funnel across 90+ briefed accounts and re-cut the qualification gate from company size to customer segment on a base-rate teardown - including catching my own small-sample artifact and reporting the fragile number instead of the clean one.
- Booked 43 partnership meetings with C-suite and VP operators at enterprise 3PLs in nine weeks of cold outreach; 33 held.

Awardco (Employee Recognition & Rewards Platform)

Nov 2022 - Jul 2025

SMB Account Executive (Jan 2024 - Jul 2025)

London, UT

- Pilot team on the launch of Awardco's first SMB product: scoped what could translate from the enterprise platform into SMB requirements, and wrote the talk track and go-to-market motion behind it.
- Pioneered a one-call-close talk track that compressed a 4-5 meeting sales cycle to two - discovery and executive presentation; adopted by the other reps, it became the norm for deals at our pricing minimum - and team close rate went up on the compressed cycle.
- Pushed lower pricing minimums into the product to prove the rewards-network USP with SMB buyers against two feature-parity competitors; the company later pivoted back to mid-market on a ~4-year SMB payback - a read the numbers supported.
- Carried client responsiveness on the static V1 back to product managers and engineering through tickets and team review - part of the input behind V2, the capped-configuration rebuild of the enterprise product.
- Shaped the SMB playbook and lobbied leadership on positioning for the new ICP; adopted by 21 account executives and used by the SDRs opening for them.
- Built my own Salesforce reporting - dashboards surfacing previously worked accounts with past activity so prospecting ran on timing instead of spray-and-pray, scaled across the hundreds of accounts each rep carried.

Enterprise Business Development (Nov 2022 - Jan 2024)

- Generated \$1.5M+ in qualified pipeline and \$871K closed - #1 of 7 enterprise SDRs in SDR-sourced closed-won revenue, #2 in gross pipeline creation - building business cases from ESG reports, 10-Ks, and executive announcements; six months of sustained outbound earned Kimberly-Clark's confidence, still one of Awardco's biggest enterprise accounts.
- Reported to the product manager who owned enterprise product, working standing with that PM and two to three engineers and escalating to the VP of Product and four to five engineers; wrote client outcomes as tickets translated into concrete product customizations engineers could build against.
- Scoped a custom HRIS integration for S. Truett Cathy Brand Restaurants so recognition points would redeem as catalog items on frontline kiosk iPads, with the employee entering HRIS credentials and nothing else.

Fiddle (Pre-PMF Operations Software Startup)

Jan 2022 - Oct 2022

Founding Account Executive

Provo, UT

- Ran 150+ customer discovery calls as the founding seller at a pre-PMF startup and built the tracker behind them, synthesizing by contact and company which value propositions earned traction and documenting the process so someone else could run it.
- Flagged a recurring prospect pain - SMB CPG brands straining against costly, inflexible ERP integrations - directly to the founder-CTO; he pivoted the roadmap toward a broader API integrations library on that signal.
- Rewrote go-to-market scripts and customer-facing copy off each product change.

EDUCATION

Brigham Young University, Marriott School of Business

Graduation: Apr 2027

MBA, Marketing & AI Integration | Product Management Leadership Team

Provo, UT

Brigham Young University

Graduation: Dec 2021

Bachelor of Humanities, American Studies | Minors: Global Business, Scandinavian Studies | Danish Fluency Certificate

Provo, UT

SERVICE & LEADERSHIP

The Church of Jesus Christ of Latter-day Saints

Volunteer Service Representative

Jun 2015 - Jun 2017

Copenhagen, Denmark

- Led volunteer teams across five cities, coordinating community programs and training initiatives while developing cross-cultural leadership and communication skills under pressure; bilingual (Danish).

PROJECTS, SKILLS & INTERESTS

Projects: Thrift Scout (autonomous deal-sourcing agent, saves 3-5 hrs/week) - SwoleQuest (in build) - Walnut (local speech-to-text tool) - aifoundry.byu.edu, built end to end: own code, Supabase backend, Vercel deployment, live users

Skills: Product requirements & PRDs - Customer discovery - Prioritization & tradeoff decisions - Funnel instrumentation & analysis - AI prototyping - Go-to-market strategy - Salesforce - Jira - SQL (working familiarity) - TypeScript/Python - Supabase - Vercel - Next.js

Interests: Amateur alpinist - Wrestler - Birder - Eagle Scout - Musician
